Boil Water Notice Rescinded

Thursday, December 07, 2017

On December 5th 2017, the Texas Commission on Environmental Quality required the **North Hardin Water Supply Corporation**, PWS 1000015, to issue a Boil Water Notice to inform customers, individuals, or employees that due to conditions which occurred recently in the public water system, the water from this public water system was required to be boiled prior to use for drinking water or human consumption purposes.

The public water system has taken the necessary corrective actions to restore the quality of the water distributed by this public water system used for drinking water or human consumption purposes and has provided TCEQ with laboratory test results that indicate that the water no longer requires boiling prior to use as of Thursday, December 07, 2017

If you have questions concerning this matter, you may contact Bobby Rogers at 409-385-7355 or at our office. 5094 FM 92 Silsbee, TX, 77656 Additional information is available at NHWSC.com.

The original notice was issued due to loss of pressure during a water main break in part of our system. The main was repaired with pressure and service re-established.
